

LP6560PCB Broadband Directional Antenna

- 650MHz-6GHz

Applications:

- Distributed Antenna Systems (DAS)
- Cellular
- WiFi
- Public safety bands

Features

Model LP6560PCB is a low profile directional antenna designed for transmitting and receiving wireless communications signals. The broadband characteristics of the enclosed antenna structure enable it to operate over a very wide frequency range with constant gain. Innovative design and manufacturing techniques result in long-lasting strength and performance.

The antenna is etched onto a low-loss microwave substrate material and mounted in a weather-resistant housing that is only 1/2" thick. There are four mounting holes for installation onto any flat non-conductive surface, such as an office wall or ceiling. Contact the factory for information on mounting to concrete or other surfaces.

Specifications

FREQUENCY RANGE: 650MHz-6GHz

GAIN: 6 dBi typical (see table)

BEAMWIDTH: See figure at right

IMPEDANCE: 50 ohms nominal

VSWR: < 1.5:1

CONNECTOR: Type N female

POLARIZATION: Linear

INPUT POWER: 15 watts CW

SIZE (L x W x H): 39.4 x 29.2 x 1.27 cm, 15.5 x 11.5 x .5 in

OPERATING TEMPERATURE: -30°F to 150°F

WEIGHT: 2 lbs. (0.7 kg)

COVER: UL94VO rated Kydex

STANDARD COLOR: Polar White

INGRESS PROTECTION: IP66

OPTIONS:

- Custom pigtail length
- Mounting brackets
- 7-16 DIN, 4.3-10 connectors
- PIM rated option
- Individual PIM testing
- Protective tray and cover

Typical Beamwidth

LP6560PCB

Options

Protective Tray and Cover Option

A mounting tray and cover are available for installations where extra protection of the antenna is required. The tray and cover are made from high impact strength polycarbonate. The antenna is pre-installed in the tray, with DIN connector accessible for external connection.

Protective Cover shown below, outside view left, with antenna installed, right. Dimensions of tray and flat cover are shown below.
